Per line – \$2.00/month

EQUIPMENT

Set top boxes & managed wireless equipment are the property of United Communications & Turtle Mountain Communications. Set top boxes & managed wireless equipment are due back upon disconnection of services. If not returned, fees will be applied.

WI-FI TIPS

Wi-Fi can operate at its optimum by following a few simple tips to boost its range and capabilities.

- **Centralize your router** – Put your router as close to the center of your home as possible.
- **Change the channel** – Log into your router’s settings by opening a browser, typing in the router’s IP address (found in the router’s manual), and checking the broadcast channel. It should be on channel 1, 6, or 11. If your Wi-Fi is running slow, try changing it to one of the other two channels.
- **Make sure your firmware is up to date** – Check your router settings and manufacturer websites for firmware updates. Follow instructions in your router manual to upgrade the software for your device.
- **Remove interference** – Move cordless phones, microwaves, and other appliances away from your router if possible, because they can interfere with your Wi-Fi signal.
- **Add bunny ears** – Most routers will support external signal-boosting technology, much like bunny-ear antennas for TVs.
- **Secure your signal** – Use a WPA password for your router to ensure that others are not able to access your Wi-Fi without your permission and slow down your services.
- **Consider your bandwidth hogs** – Some applications use more bandwidth than others, such as streaming apps like Netflix. Your other applications may be running more slowly when these bandwidth hogs are in use.
- **Upgrade your router** – If you have tried all other methods of boosting your Wi-Fi, it may be time to purchase a new router.

I (“Customer”) understand that if service is disconnected and reconnected for any reason, reconnect charges will apply. I also understand that UC and TMC’s equipment will be returned immediately upon termination of service. I agree to be bound by UC and TMC’s Terms and Conditions (“T&C”) as published on www.utma.com. My continued use of the service shall be considered my consent to any amendments that may be made to the T&C. I understand that surge and firewall protection are my responsibility, and I agree that I will be responsible for any and all damages or losses. It has been explained to me and I understand that the package price listed on this application and in all other UC and TMC materials does not include mandatory fees and taxes. I understand my bill will be larger than the package price due to these charges. I understand that the router provided in Managed Wireless is the property of UC and TMC, and I will be charged \$225 if services are disconnected and the equipment is not returned in good working condition.
